LSD (Lysergic Acid Diethylamide):

- “Re-Discovered” by Swiss chemist Albert Hoffmann in 1938
- Origins date back to the Eleusinian Mysteries (Demeter and Persephone Cult) in ancient Greece (12th-9th centuries BC to AD 600)
- Used in psychotherapy and intelligence community experiments (CIA Mind Control Programs: Projects Monarch & MKUltra) from 1953 to the present
- Made illegal in the 1960s for political reasons due to Vietnam War (safety of LSD is high)

Harm Caused by Drugs

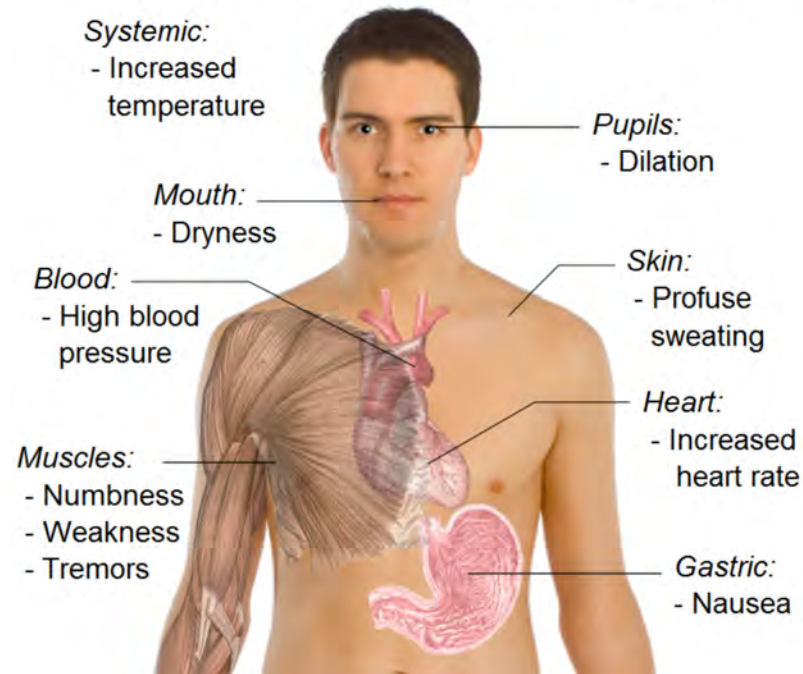

Harm of LSD to the User and Others:

- Low harm compared to alcohol, tobacco, and cannabis
- Huge upside for treating alcohol-, tobacco-, and cannabis-addiction
- No to extremely low addiction (depending on sources)
- Relatively low-priced (~1-21 € per tab)

- 2) https://en.wikipedia.org/wiki/Lysergic_acid_diethylamide

LSD effects:

- Acute LSD effect lasts 12 hours
- Learning lasts for a life-time
- Experience depends on dosage
- 1-6 tabs (100 μg per tab) are used at the same time (3 and more tabs simultaneously are only for very experienced users)
- There is no known lethal overdose

1cP-LSD

LSD

1cP-LSD:

Legal Derivative of LSD

- 1cP-LSD (prodrug) gets metabolized to original LSD in the stomach
- Sold as “Research Chemical” = legal distribution

Safe Tripping with 1cP-LSD:

- “Set & Setting” are very important
- Have a trip sitter with you
- Do not combine with alcohol
- Drink water and eat healthy
- Love 🇪🇺
